TECHNICIAN TEAM MEETING · MONDAY, NOVEMBER 9, 2026

Inspection Findings

Find it. Photograph it. Post it. Get paid.

WHAT'S CHANGING

The $25 / $50 upsell bonuses end today. This is better.

- **Inspection Findings replaces them,** and replaces last year's termite credit offer too. It covers more services.
- **You get paid for every lead that counts,** whether or not the customer buys.
- **No selling and no quoting on site.** You find it and post it. The office does the rest.
- **Easy to track.** Every post is logged and totaled weekly, and paid with normal payroll.

Why it's better for you

- Up to $4 a lead, $6 on inspection and one-time visits
- Seven things to look for, on every visit
- No waiting on a sale to get paid

HOW IT WORKS

You post it. The customer has a quote the next morning.

1

You post on site

Photos and your description in #inspection-findings, before you leave the property.

2

8 AM next morning

The automation checks the post and the customer's account, and builds the quote.

3

Customer gets it

Email with your photos and a PDF, and a text at 10 AM. Signed with your name.

4

Office closes it

A "YES" gets booked. Otherwise Steve calls to follow up.

5

You get paid

Every lead that counts goes on the sheet and into payroll.

If a post doesn't count, you'll get a short note in its Slack thread saying why, so you know for next time.

WHAT YOU DON'T DO ANYMORE

All quotes go through Inspection Findings.

- **Don't quote prices** on site.
- **Don't ask Daniel or the office for quotes.** Post it in #inspection-findings.
- **Anything the customer needs** (a problem you found, a service they asked about, a quote for anything) goes through this.
- **No same-day extra work** unless the customer asks for it and we have time. Usually they get the quote the next day and we schedule it for an upcoming day.

Exceptions: ask Daniel

- Commercial accounts
- Anything super unique

THE 7 FINDINGS

What to look for, and what each pays

FINDING	WHAT COUNTS	PAYS	INSPECTION / ONE TIME
TERMITES · CAROLINA TERMITESHIELD			
Signs of termites	Damage, mud tubes, swarmers or live termites	**$4**	**$6**
Wood or siding touching the ground	A hidden way in for termites	**$2**	**$3**
RODENTS & WILDLIFE · HOMESHIELD CRITTER CONTROL			
Rodent or wildlife droppings	In the attic, crawl space or home	**$3**	**$4.50**
Exclusion needed	A specific gap a mouse fits through that we can fix	**$2**	**$3**
Mole, vole or groundhog burrows	Tunnels, runways or holes in the yard	**$1**	**$1.50**
BEES & WASPS · HOMESHIELD SIGNATURE			
Carpenter bee burrows	Round holes about 1/2 inch, sawdust below	**$2**	**$3**
Wasp, hornet or yellow jacket nest	On the house, deck, shed or in the ground	**$1**	**$1.50**

STEPS 1 AND 2

Two photos: close, then wide

1. Photograph the problem up close

- One clear photo per issue.
- Fill the frame with the problem: the holes, the droppings, the damage.
- Use your flashlight in crawl spaces and attics. Hold still.
- This photo goes on the customer's quote, so make it count.

2. Step back. Take a wide photo

- Show where it is on the house: which wall, which corner, the deck, the porch.
- It helps the customer see exactly where the problem is.
- It also shows it's a single-family home or business, not an apartment or mobile home.

STEP 3

Voice-to-text what you see

Talk it out like you're telling the customer. Cover:

- **What it is** (carpenter bee holes, droppings, mud tubes)
- **Exactly where** (which side, room or corner)
- **How much** (three holes, a lot of droppings)
- **Active or old**
- **What the customer said** or wants
- **What you checked that looked fine**

Example

```
Customer: Jane Smith #12345
Carpenter bee holes, 4 of them, on the
fascia board above the back deck. Fresh
sawdust under two, so they're active.
Customer said she sees bees there every
spring. Wants it done before her party on
the 20th. Checked the front porch and the
shed, no holes there.
```

"Wants it done before the 20th" goes to the office on their task. It never goes to the customer.

STEP 4

Post it before you leave the property

- **One post** in #inspection-findings: customer name and ID, the photos and your description, all together.
- **Start with `Customer: Jane Smith #12345`**
- **Post on site.** The time on the customer's photos is the time you post, so it matches the visit.
- **Posted the next day?** The customer still gets the quote, but there's no bonus.

Quote request

If the customer just wants a quote and there's nothing to photograph, start the post with **"Quote request"** and say what they want. The office follows up. No bonus.

RULES THAT KEEP THE LEADS REAL

Four rules

1. One lead per customer per plan. Carpenter bees plus a wasp nest is one Signature lead, paid at the higher amount.

2. No repeats for 90 days. The same customer and plan won't pay again while the first offer's credit is still open. Otherwise the tech at a Critter-only customer every 10 weeks would report the same carpenter bees every visit.

3. "Exclusion needed" means a real, fixable gap. A specific gap a mouse could fit through (about pencil width or bigger) that our exclusion work can fix: in our scope, not too small or too big, and fixing it actually helps the customer.

4. No weekly cap for now. We can add one if totals run high.

INSPECTION / CONSULTATION AND ONE TIME SERVICE VISITS

Same steps. Bigger payout.

- **Same workflow:** close photo, wide photo, voice-to-text, post before you leave.
- **You earn 1.5x** on these visits. This may be the only time we're at that house, so be extra thorough.
- **The customer gets credit** for what they paid for the visit. Example: they paid $247 for an inspection and a one-time service, so the $447 Critter Control fix is $200.

What customers are offered

- Has another plan with us: 50% off as an account credit
- Inspection or one-time visit: what they paid, as a credit
- Returning customer: 10% off

Credits are good for 90 days. You don't need to explain pricing; the quote does.

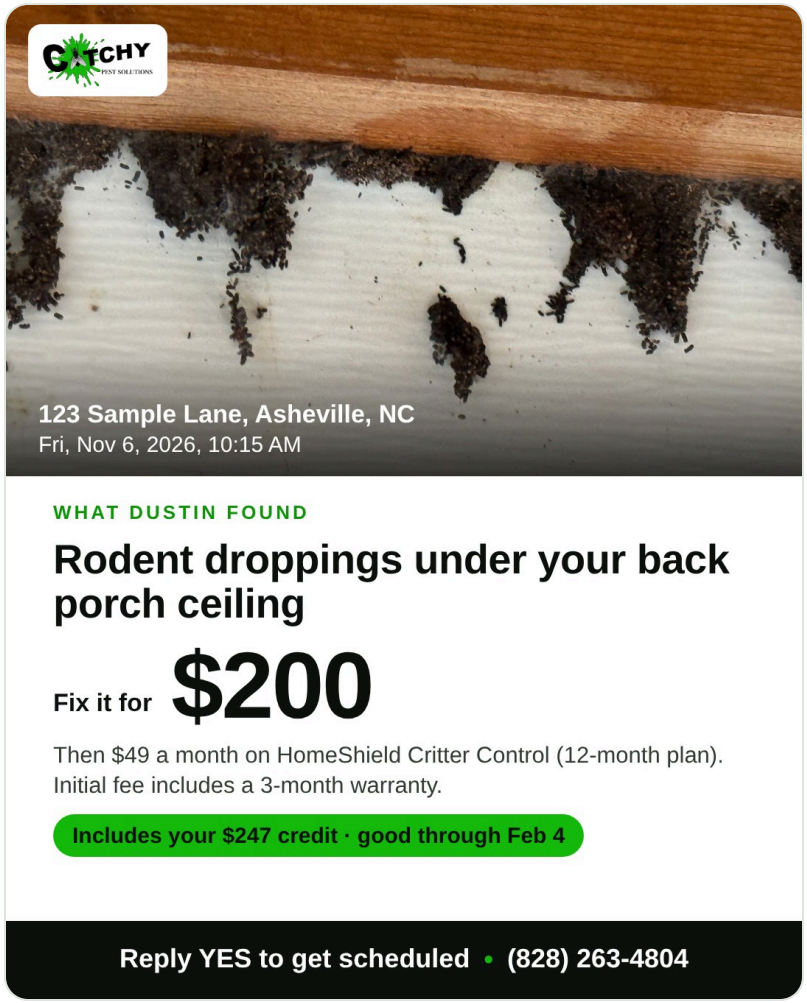

WHAT DOESN'T COUNT

No bonus for these

- **Apartments and mobile homes.**
- **Already covered by their plan.** Example: they have Critter Control and you found droppings. You'll get a note saying so.
- **Catchy Club customers.** Everything is covered.
- **Already quoted in the last 90 days** for that plan.
- **Photos that don't show it,** or no customer ID.
- **Posted the day after:** quote goes out, no bonus. More than a day late: doesn't count.
- **Not sure what it is?** Say so in the post.
- **Bats** (rare): post them as droppings. The customer gets the droppings quote and the office works up a custom bat quote.

WHAT THE CUSTOMER SEES

Your photo, your name, a clear price

The text (10 AM)

> Hi Jane, it's Dustin from Catchy Pest Solutions. I did your service Friday and found a lot of rodent droppings coming down from your back porch ceiling, plus signs in the crawl space. We can take care of it for $200 (details in the picture). Reply YES and the office will get you scheduled.

The email has all your photos stamped with the address and time, what you found, why it matters, the price and a PDF quote. Example customer and address.

GETTING PAID

Weekly, with payroll

- **Every lead that counts pays,** whether or not the customer buys.
- **Pay week:** visits Thursday through Wednesday, paid with that week's payroll.
- **Daniel sees each tech's total** every Thursday, and can fix anything that looks wrong.
- **A note in your Slack thread** tells you when a post didn't count, and why.

The field guide

Keep the printed one-page guide in your truck. It has the 7 findings, what each pays, and the 4 steps.

STARTING THIS WEEK

Questions?

Close photo. Wide photo. Voice-to-text. Post before you leave.
